Privacy Policy of Alarm Clock Card

1. Developer of Alarm Clock Card application

An iOS application, Alarm Clock Card, is developed by Masanao Sako who is a personal developer in Japan.

2. User information that Alarm Clock Card gets

The Developer of Alarm Clock Card never gets any user information from iOS devices in which the application is installed. Because Alarm Clock Card works without network connection, any data such as sleep cycle, time of falling asleep / waking up, or REM/ non REM sleep is never copied to any other devices or computers (servers as well).

3. Revision

This policy is changed at the developer's discretion. However, if there is a change in the acquired user information, purpose of use, or provision to a third party, we will notify you on this application or our website, and after changing this policy, we will obtain consent from the user again at the first start of this application.

4. Date of establishment / revision

Established: January 8, 2021
Revision: date will be updated according to the modification
